

This leaflet provides information about your forthcoming appointment so that you know exactly what to expect. We'll go into more detail during your appointment and you'll also be able to ask any questions that you may have.

## Why is it done?

Iron Infusions are for the treatment of iron deficiency anaemia and iron deficiency where oral preparations are ineffective or unsuitable.

## Cost:

Full fee payable to reception on the day of your appointment.

This fee is made up of:

- Long Appointment Fee (20 - <39 minutes) Refer: [HERE](#)
- \$45 Consultation Gap Fee
- \$85 Facility Fee

A Medicare rebate will apply to the consultation fee, regrettably there is no option to reduce or waive the Consultation Gap fee or Facility Fee.

As at January 2024 the total fee is \$255.10.

## Appointment

You will be booked in with our Primary Care Nurse and your GP. Expect to be onsite at Springs Medical for **around 1 hour**.

## Adverse Reactions
