The program will run over 8 weeks:

• The program will include an initial assessment, 2 group exercise sessions per week and 1 education session per week. The exercise sessions are run by an Exercise Physiologist and the education sessions are delivered by Allied Health. An evaluation will take place at week 8 to determine progression of participant and assess if participant would like to continue into the optional 6 week maintenance program.

Classes are conducted by a senior Exercise Physiologist in a community setting such as fitness and recreation centers. In the event of a medical emergency, basic life support and summoning of an ambulance is initiated by the Exercise Physiologist.

It is a condition of the funding agreement that a client fee be charged, however, no client is to be excluded due to inability to pay, see patient information sheet for details. The SIS coordinator/Exercise Physiologist will discuss fees and transport with clients at initial assessment and determine the fee payable by participants.

Inclusion Criteria

- Pulmonary Disease COPD, Asthma or other chronic respiratory condition without acute illness
- · Cardiovascular Disease Ischemic Heart Disease, Heart Failure, Hypertension or other risk factors
- Diabetes
- Mental Health Depression disorders and Anxiety disorders
- Musculoskeletal Osteoarthritis, Rheumatoid arthritis, Osteoporosis and Fibromyalgia
- Motivated and willing to partake in 8 week program.
- Independently mobile (can have mobility aid)
- Oxygen dependent participants can be included
